Egypt · Open to Relocation

PROFESSIONAL SUMMARY

Frontend Developer specializing in React.js and Next.js, with hands-on experience building production-grade web applications including e-commerce platforms, admin dashboards, and content-rich interfaces. Combines a self-driven engineering background with 6+ years of professional experience at Vodafone Egypt, where a production reliability mindset — SLA compliance, incident response, system monitoring — directly informs the development of performant, resilient frontend systems. Proficient in TypeScript, Tailwind CSS, Zustand, and modern Next.js patterns (App Router, SSR/SSG). Open to relocation.

TECHNICAL SKILLS

Languages & Frameworks: HTML5, CSS3, JavaScript (ES6+), TypeScript, React.js, Next.js 14
State Management: Zustand, React Context API, React Hooks (useState, useEffect, useCallback, useMemo)
UI & Styling: Tailwind CSS, shadcn/ui, Framer Motion, Responsive Design, RTL Support
Forms & Validation: React Hook Form, Zod
Performance & SEO: SSR, SSG, ISR, Lazy Loading, Code Splitting, Lighthouse Optimization
APIs & Data: REST API Integration, Async/Await, Fetch, Axios
Tools & Platforms: Git, GitHub, VS Code, Vercel, Netlify, npm
Accessibility: ARIA, Semantic HTML, Keyboard Navigation, a11y best practices
Telecom Domain: Network Monitoring, Incident Troubleshooting, SLA Management, Production Ops

PROJECTS

Nur Al-Iman — Islamic Content Platform *Next.js · TypeScript · Tailwind CSS · API Integration*

Source: [GitHub](#) | Live: [Vercel](#)

- Built a full-featured Islamic content platform with Quran reading, Azkar, and integrated audio playback, serving a complex real-world content domain.
- Engineered RTL-first UI layout and Mushaf-style Quran reading experience — demonstrating advanced CSS layout and internationalisation skills.
- Implemented synchronised Ayah highlighting during audio playback, combining media events with React state for a seamless reading experience.

- Integrated external APIs for dynamic content rendering via Next.js; applied accessibility best practices (ARIA, semantic HTML) throughout.

E-Commerce Admin Dashboard *Next.js 14 · TypeScript · Zustand · React Hook Form · Zod · shadcn/ui*

Source: [GitHub](#) | Live: [Vercel](#)

- Designed and built a scalable admin dashboard for managing products, users, payments, and analytics — inspired by real-time NOC monitoring interfaces.
- Implemented global state management with Zustand and type-safe dynamic forms using React Hook Form and Zod schema validation.
- Applied reusable component architecture with shadcn/ui; optimized rendering performance using Next.js 14 App Router and TypeScript throughout.

MonibShop — E-Commerce Storefront *React.js · TypeScript · Zustand · React Hook Form · Zod · REST API*

Source: [GitHub](#) | Live: [Vercel](#)

- Developed a modern e-commerce UI with advanced product filtering, search, and persistent cart state managed via Zustand.
- Built scalable form validation with React Hook Form and Zod; integrated REST APIs with clean async data handling across all pages.
- Focused on responsive, accessible UI and optimized loading performance — achieving fast First Contentful Paint across devices.

Personal Portfolio *Next.js · Tailwind CSS · Framer Motion · SEO*

Source: [GitHub](#) | Live: [Vercel](#)

- Designed and developed a responsive personal portfolio showcasing live projects, technical depth, and clean component architecture.
- Optimised for SEO and performance using Next.js SSG and Tailwind CSS; applied Framer Motion for polished UI transitions.

EDUCATION

Bachelor's Degree in Communications Engineering

2015

Al-Safwa High Institute of Engineering · Grade: Very Good

ADDITIONAL

- Languages: Arabic (Native) · English (Intermediate — Professional Working Proficiency)
- Available for immediate start; open to on-site, hybrid, or remote roles locally and internationally.
- 6+ years operating in 24/7 SLA-driven production environments — brings engineering discipline and calm under pressure to every project.
